PROFESSIONAL SUMMARY

Analytical and driven 3rd-year Cybersecurity student with hands-on experience in developing custom security tools, vulnerability discovery, and application analysis. Proven ability to build CLI-first tools for web and Android environments. Seeking to leverage strong programming skills and penetration testing knowledge to contribute to DeepSafer as a Cybersecurity Specialist / Penetration Tester.

EDUCATION

Bachelor of Science in Cybersecurity

Emirates International University | Expected Graduation: 2028

TECHNICAL SKILLS

- **Security Tools:** Burp Suite, Nmap, Metasploit, Netcat, Playwright.
- **Programming & Scripting:** Python, TypeScript, C++, Bash, JavaScript, Node.js, HTML/CSS, PHP.
- **Core Competencies:** Vulnerability Discovery, Dynamic Instrumentation, Static Analysis, Web/Mobile Security, Penetration Testing.
- **Languages:** Arabic (Native), English (B2 Level).

PROJECTS & TOOL DEVELOPMENT

reconnV2 | Web Vulnerability Discovery Tool

- Engineered an autonomous, CLI-first web vulnerability discovery tool that acts as a junior analyst by mapping targets and executing multi-step validation loops.
- Implemented rigorous validation mechanisms requiring cryptographic or differential proof before declaring a log, significantly reducing false positives.

Aegis Mobile | Android Application Security Toolkit

- Developed a CLI-first Android application security analysis toolkit combining deep semantic static analysis with bypass-assisted dynamic instrumentation for high-signal evidence.

CodeRooms | Real-Time Collaborative Coding

- Built a Node.js WebSocket server and a VS Code extension to enable real-time collaborative coding, shared buffers, and team chat within the editor environment.

Find The Five & Web to PDF Toolkit

- **Find The Five:** Created PHP front-end labs demonstrating five core web vulnerabilities with stubbed backend hooks for educational integration.
- **Web to PDF & Monitor Bot:** Developed a high-performance desktop app using Playwright to extract links from SPAs, and an asynchronous Telegram bot for real-time website monitoring.

CERTIFICATIONS & CONTINUOUS LEARNING

-
- **Cisco Certifications:** Certified Support Technician (CCST) Cybersecurity, Introduction to Cybersecurity.
 - **TryHackMe Completed Paths:** Jr Penetration Tester, Web Fundamentals, Pre Security, Cyber Security 101.
 - **English Proficiency:** B2 Level Certificate – E-ONE Institute.
